

GET YOUR VACCINATION NOW! SO THAT LIFE GOES ON.

Vaccination against the coronavirus is the way out of the pandemic and back to normal life for us all. **Free vaccination** currently offers the best protection against illness and the consequences of falling ill. There is sufficient vaccine available, and it is easy to get a coronavirus vaccination.

Where can I get a vaccination?

Vaccinations are carried out by **family doctors, medical specialists and company doctors** as well as at **on-site vaccination campaigns**. Dates of vaccination campaigns in the district of Unna can be found below:

- www.kreis-unna.de/impfen

Who can get a vaccination?

All persons aged 12 or over can get a vaccination.

What vaccines are there?

Four vaccines are used in Germany: the mRNA vaccines from **BioNTech** and **Moderna** and both vector vaccines from **AstraZeneca** and **Johnson&Johnson**.

Worried about side effects?

Reactions to the vaccination can occur as in the case of any vaccination. However, the complaints usually subside again quickly. Severe side effects, vaccination complications or vaccination damage are very rare.

How effective is vaccination?

The risk of infection and severe illness can be sharply reduced by vaccination against the coronavirus. Data from studies prove: Vaccination provides 95 % protection against severe illness.
